P R E F A C E.

It is with considerable pleasure, that I send forward this first Rubber Handbook with details of companies and private-estates in the East-Coast of Sumatra (Netherlands-India).

I have inserted a table of fluctuations in the price of rubber for the last 5 years, also tables of the relation of the British measures and monetary to the Chief measures and monetary of the Netherlands-India.

Owing to the difficulty of obtaining exact particulars regarding some of these concerns, the details in the following pages are not guaranteed but every care has been taken to render them as accurate as possible.

Should the particulars of any company have been inadvertently omitted, the undersigned trust that the same will be brought to his notice, so that they may be included in any future issue. I cannot omit to acknowledge the valuable assistance which Officials and Planters and exclusively O. R. L. J. MAGNÉE Esqre, General Director of the Banking and Trading Corporation NAUDIN TEN CATE & Co. LTD. Medan and Representative of the Medan — Branche of Messrs LINTNER & Co. LTD., have given me, in connection with this edition.

J. B O S.

MEDAN,
DELI,

January 1911.

Tabulated below is a method to see at a glance how many trees are planted per acre and per bouw when only the acreage and distance apart of planting is given. Thus if 18×20 is stated, take a cross reference with the combination of 18 and 20, by which it will be found that the number of trees planted is 121.
